### Notice of Fee Increase on January 1, 2003

If a reply to a "Notice of Allowance and Fee(s) Due" is filed in the Office on or after January 1, 2003, then the amount due will be higher than that set forth in the "Notice of Allowance and Fee(s) Due" since there will be an increase in fees effective on January 1, 2003. See Revision of Patent and Trademark Fees for Fiscal Year 2003; Final Rule, 67 Fed. Reg. 70847, 70849 (November 27, 2002).

The current fee schedule is accessible from: http://www.uspto.gov/main/howtofees.htm.

If the issue fee paid is the amount shown on the "Notice of Allowance and Fee(s) Due," but not the correct amount in view of the fee increase, a "Notice to Pay Balance of Issue Fee" will be mailed to applicant. In order to avoid processing delays associated with mailing of a "Notice to Pay Balance of Issue Fee," if the response to the Notice of Allowance and Fee(s) due form is to be filed on or after January 1, 2003 (or mailed with a certificate of mailing on or after January 1, 2003), the issue fee paid should be the fee that is required at the time the fee is paid. If the issue fee was previously paid, and the response to the "Notice of Allowance and Fee(s) Due" includes a request to apply a previously-paid issue fee to the issue fee now due, then the difference between the issue fee amount at the time the response is filed and the previously paid issue fee should be paid. See Manual of Patent Examining Procedure, Section 1308.01 (Eighth Edition, August 2001).

Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at (703) 305-8283.

### **DETAILED ACTION**

1. The objection to the new matter cited in the Office Action April 8, 2003 is hereby withdrawn due to the Applicant's disclosure of the term 'nematic liquid crystal' in the specification.

# Allowable Subject Matter

- 2. Claims 1-17 are allowed.
- 3. The following is an examiner's statement of reasons for allowance:

A search of the prior art did not disclose a liquid crystal display device comprising a combination of structural elements, more specifically:

- (a) The first orientation film includes a ferroelectric liquid crystal polymer, and a nematic liquid crystal layer between the first and second substrates.
- (b) Forming a first orientation film having a ferroelectric liquid crystal polymer on the first electrode, and forming a nematic liquid crystal layer between the first and second substrates.

The closest prior art by Yamamoto et al. (U.S.Patent No. 5,444,651), discloses a memory device having a liquid crystal material (53), alignment (orientation) films (56, 56') on the first and second electrodes. Yamamoto, discloses ferroelectric polymeric liquid crystal (col. 13, line 40). However, the ferroelectric polymeric liquid crystal disclosed by Yamamoto is the liquid crystal material itself (53) and not the alignment films (56, 56'). The alignment films as disclosed by Yamamoto are formed by polyimide coatings (col. 8, lines 55-58).

Application/Control Number: 09/747,932

Art Unit: 2871

Hence, Yamamoto does not teach that the alignment film (orientation film) includes a ferroelectric liquid crystal polymer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
